An Aged Brass Heavy Beehive Mortice/Rim Knob
Set fitted to a non-locking painted internal panelled
door. Our reference - 83633H

Introduction

We are proud to introduce From the Anvil ironmongery and lighting. We are specialist manufacturers of traditional window, door and cabinet fittings with over twenty years' experience in the industry.

Throughout our brochure you will find over two thousand product lines in an extensive array of finishes that will enable the complete furnishing of any type of property, both residential and commercial. Our brochure is supported with a library of information, including topical articles, inspirational case studies, image galleries, technical information, finish information and fitting advice.

We continue to develop our range year on year and feel that our latest brochure highlights our ever-growing design talent and manufacturing knowledge.

OUR HISTORY - *The From the Anvil Story*

The From the Anvil journey began in 1996 when ex metal-work teacher and joiner Mark Underhill bought a small business called MF Supplies. Mark and his wife Bernadette started to sell ironmongery and fixings to joiners and builders from their family home in a small village in Mid Wales.

In 1998, not content with the current product choice, Mark designed his own range of traditional handmade ironmongery with the help of a local blacksmith. These unique products were forged by hand from steel on an anvil giving them unrivalled strength and a wealth of character.

In 2000 the 'From the Anvil' brand was launched with the first product brochure containing around fifty handmade products. The business soon outgrew the small garage in Dolau and moved to our current factory unit in the nearby town of Llandrindod Wells. As the demand for quality handmade ironmongery became apparent, we continued to design and manufacture an extensive collection of new products. When our range of beeswax, black and pewter reached 250 products, we made the decision to wholesale our unique range through a network of Stockists throughout the UK. An extension to our factory enabled us to hold vaster stock levels and offer our Stockists a next day delivery service. We continued to design and manufacture new products on an annual basis from our mild steel, using hand forged methods. This range became known as the Blacksmith Collection.

With the manufacturing and design skills acquired throughout our journey, we made the decision to utilise our experience and expand our product offering to launch our attractive Period Collection in solid brass and bronze base materials. This gave us the ability to market a range of brass, nickel, chrome and bronze products through our Stockist Network on a next day delivery. In 2012 Mark's son Tom took over the running of the business as Managing Director.

Our premises were further extended in 2015 to allow for bespoke manufacturing and the production of our lighting range. The future of From the Anvil promises to continue an exciting journey of new products, new finishes and innovative ideas. Our success is based on quality products, excellent service and our commitment to further enhance these elements.

Our current factory unit, showroom, workshop and warehouse in Llandrindod Wells, Powys.

WHAT MAKES US UNIQUE

Forging mild steel and hot forging brass are the two key production methods behind our collection of ironmongery and are what makes From the Anvil unique.

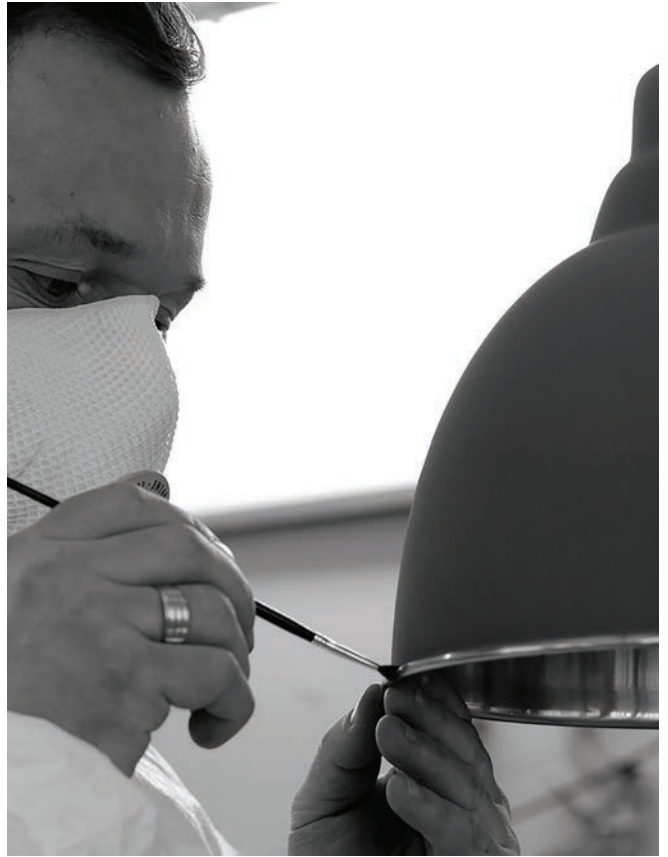

Many years of experience and a wealth of ingenuity has established From the Anvil as an accomplished manufacturer of high-end ironmongery, specialising in the manufacturing of products made from mild steel, solid brass and solid bronze. We mix CNC technology and hot forging with traditional anvil hammer work to produce the largest selection of traditional handmade ironmongery in the UK.

Nestled in hills close to the Welsh Marches, the heart of From the Anvil beats on the edge of Llandrindod Wells, the County town of Powys. Our broad site houses a large showroom, offices, warehouses, workshops, a manufacturing and finishing plant and our design hub. Our extensive setup allows us to hold a vast stock, enabling us to achieve swift delivery times and fulfil the requirements of a wide-ranging client base. We have a network of dedicated Stockists throughout the UK who stock, display and promote the From the Anvil product range on our behalf.

From The Anvil is a unique and forward thinking company and we are proud to offer an exclusive range of top quality ironmongery in a variety of traditional and contemporary finishes. We continue to focus on quality manufacturing, producing beautiful, functional products which are honed to the highest specifications and unsurpassed by others.

Choosing your IRONMONGERY

THINGS TO CONSIDER

Ironmongery is a necessity and something that you will use every day. It may seem like a small final detail, but the correct choice of door, window or kitchen furniture can totally transform the interior look, feel and function of any property.

When choosing your ironmongery there are three important things to consider; functionality, style and finish. It's important to think about these three factors simultaneously as they all affect one another. For example, the finish choice is often determined by the product type and vice versa. If you are choosing ironmongery for a complete renovation or newbuild then it is vital to consider the functionality, style and finish at an early stage in order to achieve consistency throughout a project.

Casement Window

Multi-point Locking Window

Sash Window

ONE - *Determine your Window Type*

Do you have sash or casement windows? Sash windows originate from the Georgian and Edwardian periods and slide up and down allowing the window to open and close. We have a dedicated range of Sash Furniture which is specifically designed to cater for these window types. If you have casement windows (windows which are hinged at the sides) decipher which locking mechanism they work with. When choosing furniture for casement windows, you must first establish whether your window is fitted with a multipoint locking system or requires a

more traditional fastener. Multipoint locking systems are usually fitted in UPVC or modern timber and aluminium windows for added security. This locking system requires an espagnolette handle as the spindle drives the multipoint lock which usually secures at three points within the frame. Window fasteners are suitable for use on more traditional timber windows that don't have an internal locking mechanism. Most fasteners are kept in place with a mortice plate or hook plate and are partnered with matching window stays.

Internal Four Panel Door

Internal Ledge & Braced Door

External Door

TWO - Determine your Door Type

First consider your entrance doors and what locking systems are required. A lever lock handle used with a sash lock is a traditional option, commonly used on timber doors. An espagnolette door handle with a longer backplate is designed to work with a multipoint locking system. A multipoint would lock at either 3 or 5 points within your door making this a more secure option. Secondly, consider your interior doors. Are they ledge and braced or a thicker panelled door? A ledge and braced door gives a more rustic appearance and is always

accompanied with t-hinges and a thumb latch or privacy latch. Typically, panelled doors are fitted with butt hinges and either a mortice knob, rim lock with a rim knob, lever on rose or lever on backplate. You also need to consider the purpose of the door and whether it needs a locking facility. Your choices include a standard latch (non-locking), standard lock (for doors that need locking) or a turn and release which are most commonly used on bathroom doors.

Kitchen Furniture

Accessories

Lighting

THREE - Choose your kitchen fittings & Accessories

Within our cabinet furniture range we offer many products that can be suited to both traditional and contemporary kitchens. Often a more traditional kitchen is fitted with revealed hinges and cupboard knobs, whereas more contemporary kitchens are suited to cup pulls and bar handles. Lastly, don't forget

about our large range of accessories. We offer lighting, curtain pole furniture, door stops, shelf brackets, coat hooks and much more. These useful products create continuity throughout and provide the all-important finishing touches.

Our Key Looks

Our extensive collection of traditional and period ironmongery is available in a variety of different styles and finishes. To aid you in your decision-making process, on the following pages we have highlighted six different key looks, grouping our ironmongery alongside six different property types.

DESIGN PERIOD

This look is as the title suggests based upon the standout design periods of the 19th and 20th Century. It is for those living in a Victorian terrace, Georgian town house or Art Deco flat that wish to preserve, complement or enhance the building's original architectural features.

IRONMONGERY STYLES & FINISHES

Our Period Collection of ironmongery is most suited to this look and the products in it were designed to reflect Britain's great architectural heritage. Principle finishes include brass, nickel, chrome and bronze. Our brass and bronze products have a warmth and opulence that complement dark woods and stained timber. Our nickel and chrome finishes work well with both light and dark paint colours.

NEW RUSTIC

The New Rustic look often resides in a barn conversion or oak framed building. It celebrates natural, rustic materials such as bare oak, clay tiles and reclaimed brickwork. A New Rustic interior is characterful but contemporary at the same time.

IRONMONGERY STYLES & FINISHES

Our Blacksmith Collection is a popular choice for a New Rustic property. Our beeswax, black and pewter products have a rustic feel which adds to the character, but a contemporary twist can be achieved using our period collection of brass, nickel, chrome and bronze in a kitchen for example. This look is best achieved with a combination of both collections.

CLASSIC CONTEMPORARY

Not defined by a particular design period, the Classic Contemporary look is bright and fresh without being ultra-modern. An elegant blend of 21st Century design with classic architecture and traditional references.

IRONMONGERY STYLES & FINISHES

All our finishes are well suited to this property type with a selection of different finishes for the same project often proving a popular choice. Use bronze or brass for the classic element and chrome or nickel to provide the contemporary flourish.

QUAINT COUNTRY CHARM

Quaint Country Charm is evocative of a thatched cottage in rolling hills or a historic black and white village. Traditional and authentic this look celebrates the past.

IRONMONGERY STYLES & FINISHES

The original hand forged products from our Blacksmith Collection lend themselves brilliantly to this look. Principle products include; thumb latches, hinges, and bean handles. Our octagonal mortice/rim knobs also work well. Alternatively try using our monkeytail lever handles and accompanying window furniture. The most effective finishes for this look are black or beeswax.

QUIRKY ECLECTIC

This look references classic British eccentricity. It welcomes fun, whimsical design and exudes character. The Quirky Eclectic look works well in a commercial setting and is often used when renovating an unusual space or historic building such as a chapel, turret or full-scale castle.

IRONMONGERY STYLES & FINISHES

This look is best achieved with products from our Blacksmith Collection. Consider using the Tudor, Gothic, Gothic Curved or Cromwell styles in our steel-based black, beeswax or pewter finishes.

CLASSICALLY COMMERCIAL

Classically Commercial is the look achieved in a classic hotel, guesthouse, pub or restaurant. It utilises timeless, simple design whilst adding luxurious touches. This look is understated, welcoming and practical.

IRONMONGERY STYLES & FINISHES

Our Period Collection is perfect for a Classically Commercial property. Our solid brass and solid bronze products are both practical and hardwearing. They have character and add quality. Our collection of large pull handles, finger plates and mortice knobs in brass, bronze, nickel and chrome are perfect for this look.

OUR FINISHES

Our specialist finishes have been carefully developed and refined over many years and most are completely unique to us. We are proud to offer a wide variety of hand-applied, high-quality finishes that give our customers choice. Our products have excellent anti-corrosive properties if maintained to specific requirements for each finish and will last many years if given just a little regular care.

We do not recommend using our products externally in coastal areas due to the high levels of atmospheric salt. This will rust or tarnish most finishes; only certain grades of stainless steel will not rust in these environments and therefore our products cannot be guaranteed for such use.

Please make sure any newly plastered or painted rooms are fully cured before fitting your ironmongery as moisture may tarnish or rust some finishes. For further information and advice, please see our detailed maintenance guide on pages 288-291.

Beeswax (For Internal Use Only)

Our beeswax finish is the most authentic finish for steel. After forging, the colours left in the steel range from blue to deep red ochre. To preserve these beautiful colours, our beeswax products are dipped into hot beeswax. This gives a subtle, matt richness to the metal and offers excellent protection when the products are fitted internally and properly maintained. An extremely natural finish and a far softer alternative to a black powder coated finish.

Our beeswax products are complemented by natural materials such as light, golden and rustic oak.

For accompanying external products, we recommend using our external beeswax finish.

External Beeswax (For Internal & External Use)

Our external beeswax is unique to From the Anvil and is manufactured from an anti-corrosive beeswax. It has a matt richness and like our standard beeswax, the depth of colour ranges from blue to deep red ochre. An extremely natural finish and a far softer alternative to a black powder coated finish.

Our external beeswax products are complemented by natural materials such as light, golden and rustic oak.

For accompanying internal products, we recommend using our beeswax finish.

Black Finish (For Internal & External Use)

Our black finish is a popular choice in traditional settings, it has a subtle sheen and offers a bold contrast on both stained and painted timber alike. It is baked in a high-temperature oven giving it durable corrosion resistant properties.

Our black products are complemented by natural materials such as oak or looks equally as good against both light and dark paint colours.

For accompanying products, we recommend using our antique black finish.

Antique Black (For Internal & External Use)

Our antique black finish is more textured than our standard black finish, due to the cast manufacturing methods used during production. This offers character to older properties where a very traditional look is desired. The durable corrosion resistant properties remain the same.

This finish is complemented by natural materials such as oak or looks equally as good against both light and dark paint colours.

For accompanying products, we recommend using our black finish.

Pewter Patina (For Internal & External Use)

Our pewter patina finish is forged from a durable base of steel and is a fine example of how our unique manufacturing techniques add further detail to the natural charm of metals. The process by which the contrasting textures of this finish are created results in a rich appearance that sits well in characterful, rustic homes but also offers a contemporary alternative in more modern settings.

Our pewter products are complemented by natural materials such as oak or looks equally as good against many paint colours.

For accompanying products, we recommend antique pewter, natural smooth or natural textured finishes.

Antique Pewter (For Internal & External Use)

The antique pewter finish is the result of a complex process applied to solid brass, offering an attractive alternative to pewter patina. As this finish is applied to brass rather than steel, it has fewer textural marks making it smoother than our pewter patina finish.

Our antique pewter products are complemented by natural materials such as oak or looks equally as good against many paint colours.

For accompanying products, we recommend pewter, antique pewter, natural smooth or natural textured finishes.

Natural Smooth (For Internal Use Only)

Our natural smooth products are made from a natural cast iron and finished with a clear matt lacquer. This produces a beautifully smooth look and offers a simplistic charm with versatile attributes, making it suitable for both traditional and contemporary settings.

Our natural smooth products are complemented by natural materials such as oak or looks equally as good against many paint colours.

For accompanying products, we recommend using our natural textured, antique pewter or pewter patina finishes.

Natural Textured (For Internal Use Only)

Our natural textured products are made from a natural cast iron and finished with a clear matt lacquer. Although the product surfaces are smooth, the complex finishing adds a depth of texture to each product, offering an abundance of character and suitability for both traditional and contemporary settings.

Our natural textured products are complemented by natural materials such as oak or looks equally as good against many paint colours.

For accompanying products, we recommend using our pewter, antique pewter or natural smooth finishes.

Iron (For Internal & External Use)

Made from solid iron, this finish highlights the natural beauty and texture of the metal. It is cast and finished with a clear powder coating to protect the iron from weather and moisture, this also gives it a rich depth and subtle sheen.

Our iron products are complemented by natural materials such as oak or looks equally as good against many paint colours.

For accompanying products, we recommend pewter, antique pewter, natural smooth or natural textured finishes.

Polished Brass (For Internal & External Use)

Made from solid unlacquered brass, this finish is both classic and simplistic and offers great possibilities for stately and period dwellings alike, particularly where a very traditional look is desired. When fully polished this finish has a depth of reflection. However, as the product is unlacquered this can also be left to age naturally, which over time will create a beautifully historic finish.

Our solid brass products are most complemented by a painted finish, contrasting brilliantly with dark colours, such as deep reds and greys.

For accompanying products, we recommend using our aged brass finish.

Lacquered Brass (For Internal & External Use)

Made from a solid brass base material with a quality lacquer applied to its surface. This finish is designed to avoid discolouration and oxidation, making it a great choice if low maintenance is desired.

Our lacquered brass products are most complemented by a painted finish, contrasting brilliantly with both light and dark colours.

For accompanying products, we recommend using our polished brass finish.

Aged Brass (For Internal & External Use)

Our aged brass products are made from solid unlacquered brass, offering an abundance of character and charm. This finish is perfectly suited to period dwellings and will create a statement throughout. Due to the accelerated ageing process this finish undergoes, a darker patina gathers around the edges and recesses to contrast beautifully with the re-polished surface areas.

Our aged brass products have a warm depth of colour and complement strong, dark paint colours beautifully.

For accompanying products, we recommend using our polished brass finish.

PVD Brass (For Internal & External Use)

A PVD finish is made from a stainless steel and stands for 'Physical Vapour Disposition'. PVD is designed to avoid discolouration, making it a great choice if low maintenance is desired.

Our PVD products are most complemented by a painted finish, contrasting brilliantly with both light and dark colours.

For accompanying products, we recommend using our polished brass finish.

Polished Bronze (For Internal & External Use)

Manufactured from solid unlacquered bronze containing a minimum of 85% copper, this finish can be described as a 'living finish' that adapts to its surroundings. This finish is firstly aged and then re-polished, which creates a subtle contrast between the lighter surface areas and the darker detailed areas of each product. A perfect choice for both contemporary and traditional settings.

Our polished bronze products will complement both light and dark painted wood, particularly shades of green and warm greys.

For accompanying products, we recommend using our aged bronze finish.

Aged Bronze (For Internal & External Use)

Manufactured from solid unlacquered bronze containing a minimum of 85% copper, this finish can be described as a 'living finish' that adapts to its surroundings. This finish starts off extremely dark with a rich, matt look, becoming lighter over time with use and oxidation. When copper tones start to wear through the darker layers, it achieves a contrasting warmth and a depth of character.

Our aged bronze products are most complemented by a painted finish, contrasting perfectly with light shades and dark colours alike.

For accompanying products, we recommend using our polished bronze finish.

Polished Nickel (For Internal & External Use)

Our polished nickel finish is a high-quality plating applied to solid unlacquered brass. This finish is bright, reflective and extremely versatile. It is very well suited to modern properties but equally matched to traditional settings due to the warm, calm tones. As our nickel finish is made using only one plating on brass, it offers a subtle warmth that cannot be replicated by more modern chrome finishes.

Our nickel products are most complemented by a painted finish and works very well with muted, bold and dark colours alike.

For accompanying products, we recommend using our polished chrome finish.

Polished Chrome (For Internal & External Use)

Our polished chrome products are made from a base metal of solid brass with a high quality chrome plating applied to the surface. A high sheen finish that is most commonly used in contemporary settings. This finish offers bright, bold and reflective qualities which work best if a clean, cool look is desired.

Our chrome products are most complemented by a painted finish and contrasts brilliantly with muted, bold and dark colours alike.

For accompanying products, we recommend using our polished nickel or satin chrome finish.

Satin Chrome (For Internal & External Use)

Satin chrome is created from a base metal of solid brass with a quality chrome plating applied to its surface. Satin chrome offers an understated alternative to polished chrome. Its blue traces and less reflective appearance make this finish popular with those who wish to elect a matt finish.

Our satin chrome products are most complemented by a painted finish and contrasts subtly with an array of muted, bold and dark hues.

For accompanying products, we recommend using our polished chrome finish.

Ebony Finish (For Internal & External Use)

An ebonised finish made from rosewood timber. Favoured for its rich dark tones, this finish is a popular choice in traditional properties and often used to complement rim locks or to create a statement on internal doors. When paired with brass it accentuates the traditional look and when used with nickel or chrome it creates a more contemporary feel.

Our wooden products are most complemented by a painted finish and contrast well with muted, bold and dark colours alike.

For accompanying products, we recommend using our rosewood finish.

Rosewood Finish (For Internal & External Use)

Made from high quality rosewood timber and waxed to enhance and protect its rich red hue and characterful veining. A popular choice in traditional properties where it is often used to complement rim locks. When paired with brass it accentuates the traditional look and when used with nickel or chrome it creates a more contemporary feel.

Our wooden products are most complemented by a painted finish and contrast well with muted, bold and dark colours alike.

For accompanying products, we recommend using our ebony finish.

THE COLLECTION

We are proud to present our quality collection of traditional ironmongery.

We supply our products through a network of registered From the Anvil Stockists throughout the UK and Ireland. If you need any advice or have any questions regarding any of our products or finishes or would like to discuss any bespoke work, please feel free to get in touch with your nearest Stockist or with us directly.

Alternatively, our website contains a wealth of information including technical drawings, comprehensive imagery, videos, frequently asked questions and much more. Find us on social media for the latest product releases and company news.

PENNY END T HINGES

When opened, a T hinge has the appearance of a letter 'T'. An alternative to butt hinges, T hinges are usually used in conjunction with a suffolk latch on traditional plank doors. They can also be used on cupboard doors or kitchen cabinets.

Our Blacksmith T hinges are hammered into shape from mild steel using the traditional manufacturing method of an anvil and fire. Once the mild steel T hinge has been hand forged it is finished in our factory in our available finishes, which includes beeswax, external beeswax, black powder coated or pewter patina. The end result is a strong, beautifully detailed product ideal for any traditional project.

4" T HINGE (PAIR)

Overall Length: 102mm

Hinge Arm: 80mm

Fixing Plate: 82mm x 16mm

- Sold with matching wood screws.
- Supplied as a pair.

● 33188

STORMPROOF & FRICTION HINGES

Typically used in the construction of casement windows, stormproof hinges provide the best solution for rebated windows, offering a fantastic weatherproofing system.

Friction hinges have many modern applications and can be used on many types of material including upvc and timber to provide a smooth hinged opening, eradicating any resistance from the pivoting motion. When installing a friction hinge the weight and length from the point of pivot of the window needs to be known.

A durable product that will keep a window open even in the strongest winds.

2½" STORMPROOF HINGE (PAIR)

Height: 63mm
Leaf Width: 25mm

SLIDING DOOR GEAR

Sliding door hardware is ideal for barn conversions, period properties or simply for a unique feature in the home. Suitable for internal doors weighing up to 80kg, the system creates a traditional look for sliding wooden doors with the exposed steel straps fastening down the front of the door to support the rustic finish. The beautifully crafted barn door style hangers run smoothly across the flat bar track.

A - TIP: Sliding hardware is a great way to fit a door when space is limited or when opening in/out would be impossible due to restrictions.

SLIDING DOOR HARDWARE KIT 80KG - (2M TRACK)

BEAN THUMBLATCHES

Traditionally used on a ledge and braced door, a thumb latch set is a decorative door latch with a thumb shaped lever. When the thumb shaped lever is pressed down this operates a thumb bar which passes through the door, this lifts the latch bar on the opposite side causing it to open.

Our Blacksmith thumbatches are hammered to shape from mild steel using the traditional manufacturing method of an anvil and fire. Once the mild steel thumbatch has been hand forged it is finished in our factory in our available finishes, which includes beeswax, external beeswax, black powder coated or pewter patina. The end result is a strong, beautifully detailed product ideal for any traditional project.

Our Bean thumbatches are offered in a variety of options, including standard, heavy for larger doors, xl for thicker doors and slim for finer doors.

We also offer matching Penny End T hinges and Bean 'D' handles.

A - FACT: The thickness of your door is important when ordering a thumb latch as the 'thumb bar' passes through the door & allows opening from both sides.

MEDIUM BEAN THUMBLATCH

Handle Length: 210mm
Thumb Bar Length: 140mm
Latch Length: 190mm

GOthic THUMBLATCHES

Traditionally used on a ledge and braced door, a thumb latch set is a decorative door latch with a thumb shaped lever. When the thumb shaped lever is pressed down this operates a thumb bar which passes through the door, this lifts the latch bar on the opposite side causing it to open.

Our Blacksmith thumbblatches are hammered to shape from mild steel using the traditional manufacturing method of an anvil and fire. Once the mild steel thumbblatch has been hand forged it is finished in our factory in our available finishes, which includes beeswax, external beeswax, black powder coated or pewter patina. The end result is a strong, beautifully detailed product ideal for any traditional project.

Our Gothic thumbblatches are offered in a variety of options, including standard, heavy for larger doors, xl for thicker doors, slim for finer doors and our decorative Tuscan design.

We also offer matching arrow head T hinges and Gothic 'D' handles.

A - TIP: For a traditional look, fit one of our thumbblatches with a pair or pair and a half of our T hinges for any of your internal doors.

COTTAGE LATCHES

Cottage latches are often selected for internal use as an alternative to a thumb latch or used externally for entrance and side gates.

The handing of our cottage latches is determined with a simple rule, on inward opening doors/gates, a right hand cottage latch would be required if the door/gate is hinged on the right hand side and a left hand cottage latch would be necessary if your door/gate was hinged on the left. The handing also reflects the hand you would use to operate the latch.

COTTAGE LATCH - LEFT HAND

PRIVACY LATCHES

Privacy latches are only suitable for single side access and are often chosen as a decorative solution to keep cupboard or wardrobe doors closed. Fully reversible for use on the left or right-hand side of any cupboard door.

Our Blacksmith latches are hammered to shape from mild steel using the traditional manufacturing method of an anvil and fire. Once the mild steel latch has been hand forged it is finished in our factory in a variety of our finish options. The end result is a strong, beautifully detailed product ideal for any traditional project.

LATCH SETS

Our latch sets offer a simple fastening operated with a small decorative knob which lifts up and down to open and close cupboard doors. The latch bar is restricted by the staple pin or screw on staple provided (the unused pin can be discarded). Suitable for single side access only and fully universal for use on the left or right hand side of the door application.

Our Shakespeare latch is intricately designed and is a highly decorative alternative to thumb latches or cottage latches and will enhance any internal or external setting. This comes complete with two handles, one for either side of the door. On the inward face of the door the ring turn and latch bar should be fitted, along with the provided spindle which passes through the door to connect both ring turns. When the ring is turned this lifts the latch bar to open the door.

LATCH SET

RING TURNS

Our ring turn handles are a simple and effective way of opening doors or gates, they are supplied with an 8mm spindle and require a mortice latch (please find these listed on page 264). The spindle is designed to pass through both the door and latch combined, and when the ring is turned from either side of the door this will release the rebated latch.

Our Blacksmith latches are hammered to shape from mild steel using the traditional manufacturing method of an anvil and fire. Once the mild steel latch has been hand forged it is finished in our factory in a variety of our finish options. The end result is a strong, beautifully detailed product ideal for any traditional project.

BLACKSMITH AVON LEVER HANDLES

Our Avon lever handles are our signature design and are extremely popular for their simplicity. The lever handle is hammered into shape by hand, giving it a contemporary yet individual edge.

A versatile handle that will work in all properties, whether this be a cottage, barn, apartment or town house. Also very popular for commercial properties.

We have a range of matching Avon window furniture also available along with escutcheons and bathroom thumbturns.

A - FACT: It takes nearly two hours for our skilled blacksmiths to hand-forge each and every lever on our Avon range of handles.

AVON LEVER HANDLES

Our Avon lever handles are our signature design and extremely popular for their simplicity. The lever handle is hammered into shape by hand, giving it a contemporary yet individual edge. The larger backplate design is french inspired and is a very good choice for feature and entrance doors or where a more striking look is desired.

A versatile handle that will work in all properties, whether this be a cottage, barn, apartment or town house. Also very popular for commercial properties.

We have a range of matching Avon window furniture also available.

GOTHIC LEVER HANDLES

Inspired by the medieval period, the Gothic range of handles were the first lever design we manufactured. Decorative by nature and very popular, featuring in many homes across the UK as a well known From The Anvil product.

The lever part of the handle is hammered into shape by hand and is square by design but positioned at an angle to match the gothic design on the backplate.

A - FACT: Due to the strength of the base metal we use, very fine detail and refined shapes can be achieved on all of our hand-forged products.

GOTHIC CURVED LEVER HANDLES

Similar to our original Gothic handles, this range was inspired by the medieval period with the later introduction of a curved lever, offering a more contemporary option.

The lever part of the handle is hammered into shape by hand and is comfortable to operate with its flattened lever design.

A - FACT: This style can be matched up with our peardrop window fasteners and stays to create a suite throughout your home.

TUDOR LEVER HANDLES

The Tudor range is one of our most decorative lever designs and a popular choice for internal and entrance doors.

These elegant handles have a fleur de lys motif to the backplate and are individually forged in mild steel on an anvil, enhanced with every hammer blow creating a real work of art.

A - FACT: Handles are produced from a mild steel base material, heated in fire and shaped on an anvil to achieve a traditional hand forged appearance.

CROMWELL LEVER HANDLES

The Cromwell range was inspired by our original Tudor collection but designed with a sleek straight lever giving the final product a more contemporary edge. This is one of our most decorative lever designs and a popular choice for internal and entrance doors.

These elegant handles have a fleur de lys motif to the backplate and are individually forged in mild steel on an anvil, enhanced with every hammer blow creating a real work of art.

A - TIP: The smoother lever on these cromwell handles gives a more contemporary feel to a very traditional design.

MONKEYTAIL LEVER HANDLES

The Monkeytail part of this traditional lever range starts life as a thin piece of mild steel. Our blacksmiths then heat and delicately hammer to form the curly monkeytail shape.

We also offer a large range of matching monkeytail window furniture.

Photo credit: English Shepherds Hut Co.

A - FACT: Hand forging from mild steel allows our blacksmiths to create fine detail which cannot be achieved with casting methods.

BLACKSMITH RANGE MORTICE/RIM KNOB SETS

All of our Blacksmith mortice/rim knob sets are supplied with loose collars to ensure they can be flush fitted to doors or alternatively used in conjunction with a rim lock.

Our mortice/rim knob sets should ideally be used with 3", 4" or 5" locks and latches to avoid the knob sitting too closely to the door edge and frame, as this often results in difficulties when turning and opening doors.

Please note our mortice knob sets are unsprung and will need to be fitted with 'heavy duty' locks and latches. The strength of the spring found in a heavy-duty lock/latch will ensure the knob returns to its original position once released.

A - FACT: Can be used as a stand-alone mortice knob set or in conjunction with a rim lock by removing the rose when fitting.

PRESTBURY MORTICE/RIM KNOB SETS

Our Prestbury mortice/rim knob sets are available in two sizes, the larger of the two is a great choice for more substantial or feature doors.

Manufactured from either solid brass or solid bronze resulting in a heavy, chunky product with a symmetrically classic design to both the knob and rose.

A - TIP: If you are looking to finish your property in soft neutral tones, our polished nickel finish is a recommended option and is a much softer and warmer choice than polished chrome.

PRESTBURY MORTICE/RIM KNOB SET - SMALL

FACT: Our period range of knob sets are all hand finished meaning no two products are identical. Please note a bespoke finishing service is available upon request.

MORTICE KNOB SETS

Our mortice knob sets should ideally be used with 3", 4" or 5" locks and latches to avoid the knob sitting too closely to the door edge and frame, as this often results in difficulties when turning and opening doors.

Please note our mortice knob sets are unsprung and will need to be fitted with 'heavy duty' locks and latches. The strength of the spring found in a heavy-duty lock/latch will ensure the knob returns to its original position once released.

CENTRE DOOR KNOBS

Our elegant collection of centre door knobs suit all applications from a country cottage, town house or high street shop.

All of our centre knobs are solid and made from either mild steel, solid brass or solid bronze making them very robust and substantial in weight.

All options are supplied with a fixing bolt which is designed to pass through the full thickness of the door and thread into the back of the centre knob. We also include a location pin on the rose to stop any unwanted movement during the life of your product.

For larger feature doors our Prestbury centre door knobs are an impressive statement.

BOX & RIM LOCKS

Box locks and rim locks are fitted to the surface of the door rather than being morticed in, along with a surface mounted keep that should be fitted to the door frame.

Our rim knob range is used in conjunction with our rim locks to provide an attractive, high quality finish to any period town house or country property.

We offer a large variety of attractive finishes including, iron, solid oak and solid unlacquered brass.

Please note some of the locks are universal and some are handed.

ESCUTCHEONS

Our vast range of escutcheons are designed as a finishing touch for all locking doors and are used to decorate key holes. We have covered options to mask the keyhole if preferred and we also offer both standard and euro profile to suit different locking systems. Our extensive variety of escutcheons complement all of our mortice knob designs and are manufactured from mild steel, solid brass or solid bronze.

CYLINDER PULLS

Our rim cylinder pulls are designed to work with a rim cylinder and night latch. As the name suggests this product is used on entrance doors to 'pull' or 'push' the door into the open/closed position.

Our euro door pulls work similarly to pull or push the door into the open/closed position, however they are designed to be fitted with euro cylinders. A euro pull is generally face fixed to the door using wood screws. Additionally, we offer a back to back option which is fixed with a male and female bolt-through system, concealing any fixings from the exterior side of the door for added security.

BLACKSMITH RIM CYLINDER PULL

Overall Size: 81mm x 50mm
Backplate Size: 53mm x 50mm
Projection: 26mm
Plate thickness: 5mm

- Held in place by the rim cylinder which compresses with the night latch to tighten & fix.
- Includes a location pin on rear to stop any rotational movement.

THUMBTURNS

Our thumbturns offer an added feature to any door where further privacy is required, a perfect solution for bathroom doors.

Each of our thumbturns have been designed to complement our range of mortice knob sets and lever on rose handles. We manufacture this range from mild steel, solid brass or solid bronze.

Please note that they can be fitted with a bathroom mortice lock or a stand alone tubular deadbolt. (These thumbturns are lockable from the inside only but in case of emergencies can be opened from the outside with a coin).

A - FACT: Thumbturns allow privacy from the inside of your bathroom/toilet but can also be opened from the outside in an emergency.

DOOR KNOCKERS

Our extensive selection of door knockers suit a wide variety of doors from timber, composite, upvc and aluminium offering both traditional and contemporary designs. We have options that suit narrower doors with panels/glazing panels which have less room for door furniture to be fitted. We also manufacture door knockers with larger backplates that suit large feature doors.

A - TIP: A door knocker is an attractive feature for your front door, available in various designs and a good alternative to using a door bell.

LETTERPLATES & COVERS

Our traditional letterplates & covers are an attractive option for numerous door types. For more traditional doors we have a separate system where the letterplate is fitted to the external side of the door and a letterplate cover is fitted to the internal side to reduce drafts. The cover also masks the aperture cut in order to fit the letterplate. This system is available in two sizes to suit large and small doors.

For composite and upvc doors we would recommend using our door letterbox which is supplied as a full kit and contains a tunnel and brushes to reduce drafts and insulate the door. The sleeve inside the letterbox also protects the door from moisture and masks the aperture cutting.

A - TIP: The design of our letterplate will suit many door styles & our finish options complement all door colours.

SECURITY DOOR BOLTS, VIEWERS & CHAINS

Security bolts are designed to fit into the edge of doors and windows to add improved security. They must be morticed into the door and used in conjunction with a security star key which turns and releases the bolt mechanism.

Our unique door chains are decorative by design and offer added security to entrance doors.

Door viewers are another great addition to add extra security to any entrance doors.

CUP & 'L' HOOKS

Our cup hooks and L hooks are a distinctive and unique accessory for any traditional kitchen. Multifunctional for cups, utensils, tea towels and other.

Each of our cup and L hooks are manufactured from mild steel and are handforged by our expert blacksmiths, this results in each hook being very individual.

CREATE YOUR OWN HAT & COAT RACK

Hat and Coat Racks are brilliant for keeping any entrance space, boot room or hallway tidy. Here are our tips for making your own in nine easy steps...

STEP 1.

Choose your Rack. Be creative with your choice of material. You could use natural timber, painted timber or even an old floor board. We've used a lovely piece of reclaimed oak which has been cut to size, cleaned and sanded to remove any splinters and rough edges.

STEP 2.

Choose your Hooks. Our collection is varied and includes many different styles and finishes. We have chosen to use a mix of hat & coat hooks in natural smooth. Once chosen, place the hooks in your desired position and mark through the screw holes with a pencil.

STEP 3.

Remove the hooks and drill a pilot hole on each pencil mark.

STEP 4.

Replace the first hook and secure using a manual screw driver.

STEP 5.

Measure the distance from the edge of your rack to each hook to make sure they are level.

STEP 6.

Repeat this process to fix all of the smaller hooks on to the rack.

STEP 7.

Now space the larger hooks evenly in between the smaller ones and screw them on. We have chosen to stagger our hooks.

STEP 8.

Once all hooks are secured give your rack a final dust.

STEP 9.

Firmly secure your finished rack to the wall. Once loaded with coats etc. it may become quite heavy!

CABIN HOOKS

Our range of cabin hooks are ideal for safely holding open doors and windows, often used on french patio doors. Alternatively, they can be used to secure shutters in place and keep cupboard doors closed.

3" CABIN HOOK

Hook Length: 73mm

FINGERPLATES & KICKPLATES

Normally used in commercial properties, our range of fingerplates and kickplates are a decorative solution to 'push' open doors, adding protection to the door to avoid wear in heavy traffic areas.

Please note our range of Blacksmith fingerplates and kickplates are manufactured from mild steel making them very weighty and heavy duty.

A - FACT: Made from solid mild steel giving our plates added strength and durability whilst increasing the life of your door.

PULL HANDLES

Our range of pull handles vary in use from entrance to cupboard doors, depending on the chosen size of pull handle.

Our larger pulls are available in full door length, which make a great feature on more contemporary front doors or on commercial property entrances.

Please note we can supply fixings that enable our pulls to be used back-to-back, and decorative finials to enhance the pulls, achieving a more ornamental finish (see opposite).

A - TIP: These pull handles can be fitted for single side access or used with back-to-back bolts for access both sides.

OXFORDSHIRE HOUSE

This large Grade II listed property close to the city of Oxford dates from the early 18th century. Built from traditional stone, it has a mellow clay tile roof and is set in five acres of garden, paddock and woodland. Now an exquisite family home, this period property has been meticulously restored and renovated, maintaining its original character with limestone floors and exposed oak beams and brick work.

The owners chose to use From the Anvil ironmongery throughout. Deciding on the Prestbury and Newbury styles in our solid aged brass finish. Our Prestbury Mortice/Rim Knobs look great on all internal doors. They complement the painted finish and provide continuity across all three floors. Downstairs, the many patio doors leading on to the surrounding gardens and courtyards are fitted with our Newbury Lever Handles. Our Black Hammered Copper Brindley Pendants hang in the kitchen dining area and the larger Black Copper Harborne Pendant creates a statement in the main entrance hall.

A CHESHIRE FAMILY HOME

The owners of this striking family home in the North West of England contacted us when their building project was at the planning stage. Although the property is a new build the owners wanted to maintain a classic period feel. The property has space in abundance, with high ceilings, extensive windows and a total of thirty-eight large internal doors. Rooms span across four floors and include a wine cellar, a large open plan kitchen dining area and a room tailored specifically for dogs. Our clients started to think about ironmongery six months in to the project to coincide with their choice of windows. With an eye for detail they were keen to match the ironmongery finishes throughout the property and felt that it was important to plan ahead, especially as they had different door, window and kitchen manufacturers to juggle. After mulling over a variety of products in several different finishes, our clients decided that the aged bronze finish was the perfect match for them. They wanted ironmongery that would equal the imposing scale of the property's internal doors and were determined to use our Large Prestbury Mortice/Rim Knob Sets throughout. These weighty knobs are a perfect choice and a great way to achieve their desired period feel. To create added interest, the owners opted for a dual finish in all bathrooms and fitted polished nickel knobs and thumb turns to the interior. As well as our Prestbury Knobs, Reeded Lever Lock Sets have been fitted to all external doors with matching fasteners used on the property's casement windows. Our sash hardware has been fitted on the many sash windows and a selection of period cabinet knobs, coat hooks and shelf brackets have been used throughout.

"We chose to use From the Anvil because of the quality, reasonable price, comprehensive range and approachable customer service" (Clients, February 2019).

TIGBOURNE FARM

Tigbourne Farm, on the edge of Chiddingfold is an exclusive redevelopment of a 14th century farmhouse and three 16th to 18th century barns. The extensive plot also houses three early 20th century dairy barns. These ancient buildings feature soaring ceilings, exposed original timbers, inglenook fireplaces, beautifully crafted oak windows and doors, and a mixture of oak and York stone floors. All the properties are Grade II listed and have been expertly restored to accentuate their many original features, all of which have been tastefully complemented with From The Anvil traditional ironmongery. Beeswax and Black Suffolk Latches, T Hinges, Straight Lever Handles and Shepherds Crook window fittings are only a few of the many products used in these desirable properties.

The craftsmanship and meticulous attention to detail that has gone into the renovation of this site over the past five years is evident throughout. Experts in traditional joinery, carpentry and stonemasonry were commissioned by owner Buddy Soubra, who has dedicated vast amounts of time and expense in creating these gorgeous unique homes. Tigbourne Farm is an extremely rare example of a medieval hall structure and is one of only five in Surrey. Mr Soubra felt it was important to choose traditional materials and fittings in keeping with the historic heritage of the buildings to ensure none of the original character was lost.

THE COACH & HORSES

The Coach & Horses is a traditional Grade II listed coaching inn set in the idyllic village of Bolton-by-Bowland in the heart of the Ribble Valley, Lancashire. After nine months of intensive work the Proprietors have created seven beautiful boutique rooms, a copper clad bar, microbrewery, cosy restaurant, new kitchen and beer garden. Our Aged Brass Prestbury Mortice/Rim Knob Sets, Oval Euro Escutcheons and Round Bathroom Thumbturns have been fitted on all bedroom and bathroom doors and complement the boutique look well. Our Natural Smooth 6 1/2" Hat & Coat Hooks have been fitted in the entrance hall for guests to use upon arrival.

If you would like to find out more about this unique boutique inn, then please visit their website; www.coachandhorsesribblevalley.co.uk and book your next relaxing getaway.

SHEPHERD'S CROOK FASTENERS

A decorative style of fastener which highlights the delicate skills of our blacksmiths. The mild steel is heated until red hot and gently shaped to replicate the end of a shepherd's crook.

PEARDROP FASTENERS

Our Peardrop fasteners are simple and attractive, available in a large variety of finishes and functional designs.

The Peardrop range of fasteners are available in reversible, non-locking or locking night vent options.

A - FACT: Our fasteners come in reversible designs or handed night venting and locking options for added security and ventilation.

WINDOW STAYS & ACCESSORIES

From The Anvil window stays are used to hold casement windows in a specific open or closed position. Casement pins are fitted on the bottom of the window frame to locate the stay.

Stays can also be fitted to windows for decorative purposes where they are not necessary to keep the window shut/locked.

TIP: For a more contemporary setting a polished nickel or chrome finish is a good option.

SLIM PEARDROP ESPAGNOLETES

Our range of Peardrop espagnolette fasteners offer a sleek but traditional looking product with all the benefits of a modern and secure configuration. As the name suggests the 'slim' backplate allows this product to be used on windows with width restricted profiles. Produced from solid unlacquered brass.

Our espagnolette window fasteners include a fixed 7mm spindle which is specifically designed to operate a stand alone window lock or a full length espagnolette window locking system.

SASH WINDOW FURNITURE

Sash window furniture is still a very popular choice for the restoration of Georgian, Edwardian and Victorian properties and is often compulsory in some listed buildings.

Our collection of sash furniture complements all other products within our range, allowing a consistent finish throughout a property or project.

FANLIGHT WINDOW FURNITURE

A fanlight window normally refers to a window that sits above a door or another window. Traditional fanlight windows are normally fitted with a fanlight screw opener or fanlight catch which can be operated using a window winder for hard to reach windows.

Fanlight windows tend to be top / bottom hung and open inwards. To restrict the opening of the aperture of the window a quadrant or roller arm stay can be positioned at the side of the window and fixed to the frame.

Our range of complementary fittings offer a traditional finish to any fanlight window whether this is new or restored.

TRICKLE VENTS, CANOPIES & GRILLS

To provide ventilation in new or restored windows, a trickle vent can be fitted. This requires a small aperture cut-out in the window, large enough to accommodate the various size vents.

A vent should be fitted to the interior of the window which can be adjusted to an open/closed position to allow continuous or no ventilation.

On the exterior of the window there are two options, a grill being a less intrusive or visible option which is simple to install by screwing over the cut aperture on the external face of the window. Alternatively, a canopy can be fitted externally, this is not flush fitting and will protrude from the exterior of the window. A canopy is incorporated with wire meshing which reduces insects and moisture reaching the inside of the window or property.

CURTAIN POLE FURNITURE

Our curtain pole furniture was introduced to complete our range and allow any project to be fully furnished with From The Anvil products, down to the finest detail.

We offer a broad range of decorative finials catering for all tastes, with a core range of poles, brackets, tie-backs and rings. Our range is handforged which creates very fine detail and texture in the finished products.

Our finials can also be used with our large pull handles instead of using the standard end caps provided.

PENDANT LIGHTING COLLECTION

Our unique collection of pendants reference Britain's great industrial heritage. With four distinctive shapes in a number of different finishes, our lights can be used to transform an array of spaces.

Each pendant is hand spun from solid steel & finished in copper or nickel.

All our lights are made to order in our UK factory. We offer customised pendants and are more than happy to create bespoke colours and finishes if desired.

BRINDLEY PENDANT COPPER

The Brindley Pendant is a versatile choice. It can be hung at different levels to brighten certain areas within a room and looks great in a group. The hammered copper interior creates a warm, dappled light and is perfectly complemented by a choice of black and grey matt exterior colours. Also available in a selection of subtle accent colours which are finished with a white gloss interior.

All pendants are supplied fully wired with a matching ceiling rose and all necessary fixings. 1.5M of black fabric cable is supplied as standard but LED bulbs with a maximum of 6w must be purchased separately.

A - TIP: Additional lengths of cable & alternative colours can be purchased to make your pendant lights more individual & unique.

BRINDLEY PENDANT HAMMERED COPPER

Diameter: 260mm

Height: 270mm

Rose Diameter: 120mm

Fitting: E27

Bulb: LED Only - 6W Maximum (purchased separately)

- Hammered copper interior with a choice of copper, black, dark or light grey matt exterior.
- Sold with a matching ceiling rose and all necessary fixings.
- 1.5m of black fabric cable is supplied as standard. Extra cable can be purchased at £3.94 per meter - use code 49512.

BRINDLEY PENDANT NICKEL

The Brindley Pendant is a versatile choice. It can be hung at different levels to brighten certain areas within a room and looks great in a group. The sleek nickel finish bounces light and creates a contemporary feel. Our nickel pendants are complemented by a choice of grey matt exterior colours.

All pendants are supplied fully wired with a matching ceiling rose and all necessary fixings. 1.5M of black fabric cable is supplied as standard but LED bulbs with a maximum of 6w must be purchased separately.

A - TIP: Grouping pendants together or at differing heights further enhances the look & creates a stunning focal point in any room or entrance way in your home.

FULL COLOUR & BURNISHED BRINDLEY PENDANT

The Brindley Pendant is a versatile choice which can be hung at different levels to brighten certain areas within a room and looks great in a group. The burnished copper finish is unique in its design due to the hand finishing technique used to create the burnished effect.

Our full colour pendants offer a more contemporary option and can be used in a variety of different settings.

All pendants are supplied fully wired with a matching ceiling rose and all necessary fixings. 1.5M of black fabric cable is supplied as standard but LED bulbs with a maximum of 6w must be purchased separately.

A - TIP: Our burnished pendants pair well with our aged bronze and polished bronze ironmongery range.

HARBORNE PENDANT COPPER

The Harborne Pendant embodies classic British design. It's rounded edges and satisfying proportions make it the perfect focal point in any room. The Harborne Pendant is available in hammered copper or smooth nickel and also looks great in a selection of subtle accent colours which are finished with a white gloss interior.

All pendants are supplied fully wired with a matching ceiling rose and all necessary fixings. 1.5M of black fabric cable is supplied as standard but LED bulbs with a maximum of 6w must be purchased separately.

A - TIP: Coloured pendants are perfect for introducing an understated accent colour in any room & can be finished in bespoke colours to match your walls or furniture.

FULL COLOUR & BURNISHED HARBORNE PENDANT

The Harborne Pendant embodies classic British design. It's rounded edges and satisfying proportions make it the perfect focal point in any room. The burnished copper finish is unique in its design due to the hand finishing technique used to create the burnished effect. Our full colour pendants offer a more contemporary option and can be used in a variety of different settings.

All pendants are supplied fully wired with a matching ceiling rose and all necessary fixings. 1.5M of black fabric cable is supplied as standard but LED bulbs with a maximum of 6w must be purchased separately.

LOCKS, LATCHES & ACCESSORIES

We offer a range of accessories that are necessary to operate all From The Anvil fittings and that complement all finishes within our product offering.

Our locks, latches & accessories are seen as an important part of our product offering owing to their necessary purpose. Due to the substantial weights of the majority of our products we recommend using high quality locks, latches & accessories.

A - FACT: We can supply our locks and latches with black faceplates and keeps to match the traditional products in our range.

TUBULAR MORTICE LATCH

Forend Size: 57mm (L) x 26mm (W)

HERITAGE AUTO LOCK

Overall Height: 1770mm

Centre Case Size: 63mm (D) x 185mm (H) x 15mm (T)

Hook Lock Box Size: 45mm (D) x 113mm (H) x 15mm (T)

Backset: 45mm

- For both replacement period doors and prestige new build doors.
- The euro profile locking cylinder of AV2 Heritage is located at a similar height to a traditional round cylinder pull but provides instant higher security as the lock is operated automatically as soon as the door is closed.
- This means that an external lever handle is not required to operate the locking points and the lock can be deadlocked or opened externally by turning the key a quarter of a turn.
- From the inside the door can be opened by an internal thumbturn.
- The door is automatically locked when closed from the inside and the key is required to gain entry from the outside.
- Automatic locking on closing the door with 2 solid anti pushback hooks which fully penetrate the steel keeps helping to prevent forcing a part of the door and frame.
- Order matching keeps separately.

HERITAGE THUNDERBOLT LOCK - 1.77M

Overall Height: 1770mm

Centre Case Size: 63mm (D) x 186mm (H) x 15mm (T)

Deadbolt Lock Box Size: 45mm (D) x 113mm (H) x 15mm (T)

Backset: 45mm

- For both replacement period doors and prestige new build doors.
- Simply operated with just a Euro Profile Thumbturn Cylinder which is located at approx. 2/3 of the door height to replicate the rim locking night latch found on traditional doors.
- An external lever handle is not required to operate the locking points and the lock can be deadlocked or opened externally by turning the key through 270°.
- Order matching keeps separately.

92147

BZP - £157.74

THUNDERBOLT LOCK - 2.1M

FRENCH DOOR MULTI POINT LOCK KIT

Door Height: Min. 1830mm & Max. 2115mm

- Kit includes: Master lock, slave lock, top & bottom shootbolts (x4), all keeps.
- Suitable for securing flush french timber doors. The master lock securely engages into slave mechanisms & automatically deadlocks a slave unit once operated. No need for false (dummy) mullion and a non-handed lock mechanism with reversible sash bolt.
- Accepts a standard 92mm unsprung lever handle, double-sprung 92mm lever handle and euro profile cylinder.
- We recommend using a keyed alike euro cylinder with this lock.
- Supplied with all necessary fixing screws.

OUR BESPOKE SERVICE

Observation, ingenuity and experience are all key to our ongoing product development. We currently offer over two and a half thousand different product lines and continue to expand our range with new designs and product ideas. Customer satisfaction is very important to us and our team works hard to answer all enquiries and meet customer demand. If you have any special product requirements that we don't already cover, we will happily consider any bespoke work such as custom finishes or manufacturing.

Feel free to contact us for further information about our bespoke manufacturing service or to discuss any product alterations.

— MAINTENANCE & CARE GUIDE —

General Maintenance & Warnings

Our specialist finishes have been carefully developed and refined over many years and most are completely unique to us. We are proud to offer a wide variety of hand-applied, high-quality finishes that give our customers choice. Our products have excellent anti-corrosive properties if maintained to specific requirements for each finish and will last many years if given just a little regular care. To help you maintain your chosen finish, we have included a specific maintenance and care guide tailored to each finish within our range, this will ensure your products last for many years to come!

We do not recommend using our products externally in coastal areas due to the high levels of atmospheric salt, as this will rust or tarnish most finishes. Only certain grades of stainless steel will not rust in these environments and therefore our products cannot be guaranteed for such use. Please make sure any newly plastered or painted rooms are fully cured before fitting your ironmongery, as moisture may tarnish or rust some finishes.

When painting, staining or plastering we recommend that all ironmongery is removed before proceeding and that rooms are left to fully cure before your ironmongery is fitted. Please avoid using any form of chemical cleaner, e.g. oxalic acid or aerosol sprays to clean products, as this can permanently damage any finish.

We recommend periodically oiling any moving parts on all products to ensure they perform to their full capacity, especially when fitting externally. We would also strongly advise that this is carried out upon initial installation. Wiping over the surface area of your products from time to time with an oily cloth will also remove any harmful deposits that build up on the surface and will aid protection from environmental factors. We recommend using our '3-in-One Oil' (22314) for all moving parts and surface areas. Some of our products benefit more from re-waxing with our 'Maintenance Wax' (33002) which will aid protection from environmental factors and help to preserve some metal and wood finishes.

Recommended Maintenance Products

73102 - Brasso (75g) - R.R.P. £7.39

22314 - 3-in-1 Oil (200ml) - R.R.P. £3.14

73101 - Black Touch Up Paint (12.5ml) - R.R.P. £12.80

33002 - Maintenance Wax (100ml) - R.R.P. £6.86

Fixing Screws

The fixings supplied with our products are hand-made from mild steel or stainless steel. Due to the hand-made nature of our fixings, a little extra care needs to be taken when fitting. It is always recommended that a pilot hole is drilled (especially into hard woods) for all our fixings. Ideally it is suggested that screws are rubbed with candlewax before fitting to ease the application. Please take the upmost care when fixing our screws, as many of our products are supplied with traditionally slotted screws. We recommend that along with drilling a pilot hole, a well-fitting screwdriver should be used. Please avoid fixing by way of an impact driver or drill operated screwdriver, due to the hand-made nature of the fixings.

All of our screws can be purchased in quantities of 25 to replace lost or damaged screws, please see pages 284-285 for further details. A number of our screw options are also available in raised-head and countersunk stainless steel if preferred.

Please refer to the following maintenance advice. For more information on the manufacturing process, accompanying products and complementary colours for each finish please see pages 20 – 25. Further information can be found on our website or alternatively our sales team are happy to answer any enquiries over the phone or by email.

Beeswax Finish *Suitable for internal use only.*

To ensure the finish on your Beeswax product always remains at its best, we would advise re-coating your product with our ‘Maintenance Wax’ (33002) from time to time. This adds further protection to the metal and helps to prevent any rust or white blooms forming. Due to temperature changes or packaging, a Beeswax product may occasionally show signs of a white bloom upon opening. This can be buffed with a soft cloth to remove.

Please note that where possible we would recommend using our External Beeswax in areas of your property with high moisture content, such as bathrooms or kitchens. Light surface rust may appear if using our standard Beeswax in damp internal environments, but this can be removed with ease. To remove, we recommend rubbing the product with 00 grade wire wool and then re-coating your product with our ‘Maintenance Wax’ (33002), using a cloth or brush. This will restore the finish and aid protection. Regular oiling of all moving parts using our ‘3-in-1 Oil’ (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation.

Please note that we offer a matching External Beeswax finish, which should be used when fitting the Beeswax range externally.

External Beeswax Finish *Suitable for use both internally and externally.*

Although the finish already offers a very strong barrier against environmental conditions, we recommend re-applying a small amount of our ‘Maintenance Wax’ (33002) periodically with a cloth or brush. This provides additional protection to the surface of your product and further protects this from any harmful external elements. Regular oiling of all moving parts using our ‘3-in-1 Oil’ (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation.

Please note that we offer a matching standard Beeswax finish for use where an external finish is not required. For bathrooms, porches or any other areas of your property with high moisture content, we would recommend using External Beeswax products where possible.

Black Finish *Suitable for use both internally and externally.*

This finish is extremely low maintenance and perfect for use in bathrooms, kitchens or externally where damper environmental conditions are expected. Regular oiling of all moving parts using our ‘3-in-1 Oil’ (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation. An oily cloth can also be used to wipe over the product from time to time to aid protection against exterior or environmental elements. For any minor scratches that may occur with general wear and tear of your product, we offer a durable ‘Black Touch Up Paint’ (73101) if required.

Antique Black Finish *Suitable for use both internally and externally.*

This finish is extremely low maintenance and perfect for use in bathrooms, kitchens or externally where damper environmental conditions are expected. Regular oiling of all moving parts using our ‘3-in-1 Oil’ (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation. An oily cloth can also be used to wipe over the product from time to time to aid protection against exterior or environmental elements. For any minor scratches that may occur with general wear and tear of your product, we offer a durable ‘Black Touch Up Paint’ (73101) if required.

Pewter Patina Finish *Suitable for use both internally and externally.*

This finish is very low maintenance and is suitable for use in bathrooms, kitchens and for external purposes. Regular oiling of all moving parts using our ‘3-in-1 Oil’ (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation. An oily cloth can also be used to wipe over the product from time to time to aid protection against exterior or environmental elements.

Antique Pewter Finish *Suitable for use both internally and externally.*

Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation. An oily cloth can also be used to wipe over the product from time to time to aid protection against exterior or environmental elements.

Natural Smooth Finish & Natural Textured Finish *Suitable for internal use only.*

Our 'Maintenance Wax' (33002) should be wiped over the product from time to time to form a protective barrier, particularly if used in damper internal environments, such as kitchens or bathrooms. Light surface rust may appear if using in damp internal environments, but this can be removed with ease. To remove, we recommend rubbing the product with 00 grade wire wool and then re-coating your product with our 'Maintenance Wax' (33002), using a cloth or brush. This will restore the finish and aid protection. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation.

Iron Finish *Suitable for use both internally and externally.*

Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation. Our 'Maintenance Wax' (33002) should also be wiped over the product from time to time to form a protective barrier, particularly if the intended use is external or in a porch, bathroom or kitchen.

Polished Brass Finish *Suitable for use both internally and externally.*

As our brass is unlacquered, it will naturally age through oxidation, giving the product added character. However, if desired this finish can be maintained to a bright 'polished' finish with periodic polishing. To achieve this, please use a dry cloth or alternatively our 'Brasso' (73102) can be used to assist with the cleaning of solid brass products. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation. An oily cloth can also be used to wipe over the product from time to time to aid protection against exterior or environmental elements.

PVD Brass Finish *Suitable for use both internally and externally.*

We recommend avoiding the use of any chemicals or cleaning products on this finish. An oily cloth can be used to wipe over the product from time to time to remove any harmful deposits that build up on the surface of your product, this will also aid protection against any environmental elements. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation.

Lacquered Brass Finish *Suitable for use both internally and externally.*

We recommend avoiding the use of any chemicals or cleaning products on this finish to prevent a break-down of the lacquered top-coat. An oily cloth can be used to wipe over the product from time to time to remove any harmful deposits that build up on the surface of your product, this will also aid protection against any environmental elements. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation.

Aged Brass Finish *Suitable for use both internally and externally.*

This finish will continue to oxidise and age as it is an unlacquered finish, meaning the finish will darken over time. If the product becomes tarnished or too dark, it can be polished on all surface areas to enhance the finish. To restore and brighten the finish, we recommend polishing with a dry cloth or alternatively using our 'Brasso' (73102), which assists with the cleaning of solid brass products. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation. An oily cloth can also be used to wipe over the product from time to time to aid protection against exterior or environmental elements.

Polished Bronze Finish *Suitable for use both internally and externally.*

This finish will oxidise and age as it is an unlacquered finish, meaning it will darken over time. If the product becomes tarnished or too dark, it can be polished on all surface areas to enhance the finish. To restore and brighten the finish, we recommend polishing with a dry cloth or alternatively using our 'Brasso' (73102), which assists with the cleaning of solid bronze products. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation. An oily cloth can also be used to wipe over the product from time to time to aid protection against exterior or environmental elements.

Aged Bronze Finish *Suitable for use both internally and externally.*

This finish will initially lighten with use to reveal the copper tones from the metal beneath. If desired, a dry cloth can be used to accelerate this process, which will reveal more of the warm copper tones within the base metal. Please avoid using 'Brasso' (73102) or any other cleaning products on this finish, as this will strip the product of its dark rich character. If you were to over-polish or strip the product of its aged charm, then please note that the finish will oxidise and darken again in time. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation. An oily cloth can also be used to wipe over the product from time to time to aid protection against exterior or environmental elements.

Polished Nickel Finish *Suitable for use both internally and externally.*

We recommend avoiding the use of any chemicals or cleaning products on this finish as it may affect the plated finish. An oily cloth can be used to wipe over the product from time to time to remove any harmful deposits that build up on the surface of your product, this will also aid protection against any environmental elements. A dry cloth can also be used to wipe over the product and reduce finger marks. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation.

Polished Chrome Finish *Suitable for use both internally and externally.*

We recommend avoiding the use of any chemicals or cleaning products on this finish as it may affect the plated finish. An oily cloth can be used to wipe over the product from time to time to remove any harmful deposits that build up on the surface of your product, this will also aid protection against any environmental elements. A dry cloth can also be used to wipe over the product and reduce finger marks. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation.

Satin Chrome Finish *Suitable for use both internally and externally.*

We recommend avoiding the use of any chemicals or cleaning products on this finish as it may affect the plated finish. An oily cloth can be used to wipe over the product from time to time to remove any harmful deposits that build up on the surface of your product, this will also aid protection against any environmental elements. A dry cloth can also be used to wipe over the product and reduce finger marks. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation.

Ebony Timber Finish & Rosewood Timber Finish *Suitable for use both internally and externally.*

Best suited for internal use but can also be used externally if well maintained. Please note that we recommend regular waxing of your timber products with our 'Maintenance Wax' (33002). This will help to prevent any discoloration or drying of the timber. Waxing also helps to provide a protective barrier against environmental elements. Regular oiling of all moving parts using our '3-in-1 Oil' (22314) is beneficial to the longevity of your products. This process is also highly recommended during initial installation.

SUPPLY POLICY

It is our policy to distribute our products through a strong network of registered 'From The Anvil' trade and retail outlets throughout the UK, namely Architectural Ironmongers, Builders Merchants and other Independent Shops. We also have a number of Online Stockists that distribute our range throughout the UK and overseas.

Please visit www.fromtheanvil.co.uk and see our 'How to Buy' section for a recommended Local Stockist by entering your postcode or alternatively links to our recommended Online Stockists.

CONDITIONS OF SALE

1. Slight variations in sizes and colour may occur due to the hand-crafted nature of the products. This is why people buy our products, because no two items are the same.
2. All items shown within this catalogue are offered subject to availability.
3. Any prices or quotations obtained verbally will not be deemed valid, nor will any responsibility or intent be accepted.
4. Deliveries direct to site will not be undertaken without a full postcode, contact name and telephone number. Please note that 'From The Anvil' does not accept any liability for site deliveries and they are sent at the customers' own risk.
5. Whilst 'From The Anvil' endeavours to offer outstanding service, our prompt progression of orders means that we may be unable to include additions with the main consignment once it has been processed and packed. Hence these may be considered as a separate order and be subject to additional carriage charges.
6. All requests for returns must be made in writing. The customer will be charged a restocking charge and the goods are to be returned at the customers' own expense. The goods must be in a re-saleable condition and must be authorised by us. If packaging is not complete no credit will be given. The customer must provide us with the original invoice, despatch note or other proof of purchase. All goods will be thoroughly inspected before credit is given.
7. Claims for shortages, damaged goods or incorrect supply must be notified within 7 days of receipt. No responsibility will be accepted after this interval as the goods will be deemed examined and satisfactory.
8. To the best of our knowledge, all definitions, descriptions and photographs contained in this catalogue are correct at the time of going to press. We cannot, however, be held legally liable for any inaccuracies of definition or description.

Please note that any information within this catalogue is to be used as a recommendation of use only, and 'From The Anvil' does not accept any liability. 'From The Anvil' customers are encouraged to seek additional technical advice.

Due to the printing process we advise that you do not use the colour images in this catalogue as an indication for colour replication.

9. In the event of goods proving faulty by way of manufacture, 'From The Anvil' will replace the same but in doing so, no liability, consequential or otherwise, is accepted.
10. 'From The Anvil' warrants that the goods are of merchantable quality (as defined in the Sale of Goods Act 1979) but does not warrant that the goods are fit for any specific purpose and accepts no liability for any loss or damage suffered by the customer as a result of any defect in the design, materials or workmanship of the goods.
11. The customer shall indemnify 'From The Anvil' in respect of any loss, injury, expense or claim of whatsoever nature and howsoever arising out of the contract, or the goods, or their storage, installation, use, operation or maintenance save to the extent that the same is caused by negligence of 'From The Anvil', its servants or agents, including 'From the Anvil's subcontractors.

N.B.

is a registered Trademark and may, in no way be reproduced, replicated or copied without prior consent or agreement from the management.

Wherever possible our products have been stamped with an 'Anvil Authentication Mark' to show genuine 'From The Anvil' products.
